Perpetual license		\$69	\$119

All web services subject to third-party availability. Auto-translate with Google is \$30/year for one million translation credits.

## Premium Voices

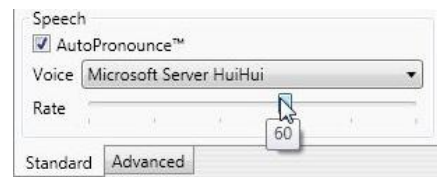

Learning to **speak Chinese** can be challenging. It's hard to find a patient, personal tutor who can pronounce the same words over and over again--with consistent pronunciation. As your ears and brain process the various tones, it's easy to become frustrated when "almost" just isn't good enough.

Understanding **conversational Chinese** can also be difficult. When you're learning, you want to hear the words pronounced slowly enough to distinguish the subtle tones in each word. As your proficiency improves, hearing the sentences at normal or faster pace prepares you for conversations in the real world.

MDBG's new Premium Voices feature **rate control**. Optimize the pronunciation of Chinese to fit your needs--and change it at any time. Unlike programs that use older, pre-recorded voices, Chinese Reader lets you choose a different voice at any time.

Unlike the Bing voices (included with Professional and Standard editions), Premium Voices do not rely on a web service; instead, MDBG Chinese Reader includes Microsoft's powerful speech server technology into your notebook or desktop computer. Travel anywhere--even in places where a web connection is slow or unavailable--and your Premium Voices will always be available.

When you need to focus on a single word, let MDBG Chinese Reader tirelessly pronounce the same word as many times you need to hear it. Rate control lets you adjust both the pronunciation rate and the pause between words. To develop your conversational skills, hear phrases and sentences spoken to you at faster rates. Unlike older programs which only use pre-recorded voices, Chinese Reader lets you choose the voice you prefer. Immediately hear regional differences (China vs. Taiwan) for Mandarin or listen to the same Chinese text in Cantonese (Hong Kong).

**MDBG Chinese Reader Professional** is the most complete augmented learning system for Chinese. Accelerate learning with custom dictionaries and word tracking. Choose from two high quality voices (Bing HuiHui and Bing HanHan). Add a new entry interactively (one word at-a-time) or from a formatted text list. Entries may be grouped by dictionaries (e.g., politicians, celebrities, time, web, etc.). Display custom definitions only when needed. Import ZDT flashcards as custom dictionaries. Export dictionaries to share with other MDBG Chinese Reader Professional users.

Suggested users for the Chinese Reader Professional include:

- *Chinese schools, classes and instructors* – define words and phrases to teach your students precise meanings and applications for your course. Not all learners need the same dictionary. Students may require basic definitions while working professionals will appreciate words defined at their level.
- *Advanced users and organizations* – add words and phrases that are specific to your industry or company. Include usage notes to speed understanding. For example, create entries for key customers, products and programs within your organization. Quickly share custom dictionaries with other MDBG Chinese Reader Professional users. The possibilities are unlimited!

**MDBG Chinese Reader Standard** is a popular choice for both students and professionals. Improve your understanding of Chinese with both Auto-translate and WebTranslate. If English is not your native language, use MDBG's exclusive MLX Auto-translation into your choice of 30+ languages. The new breakdown feature makes it easier to understand complex words and phrases by reducing them to smaller components. Generate custom study lists with the versatile Copy+ function.

**MDBG Chinese Reader Free** is an entry-level tool to help novice students and casual learners. It's faster and more powerful than copy+paste to online dictionaries or other web-based resources. Chinese Reader works offline (no Internet required) and online (for web search, auto-translations). Upgrade to Standard or Professional at any time.
