

Chinese Reader

Version 6 for Windows

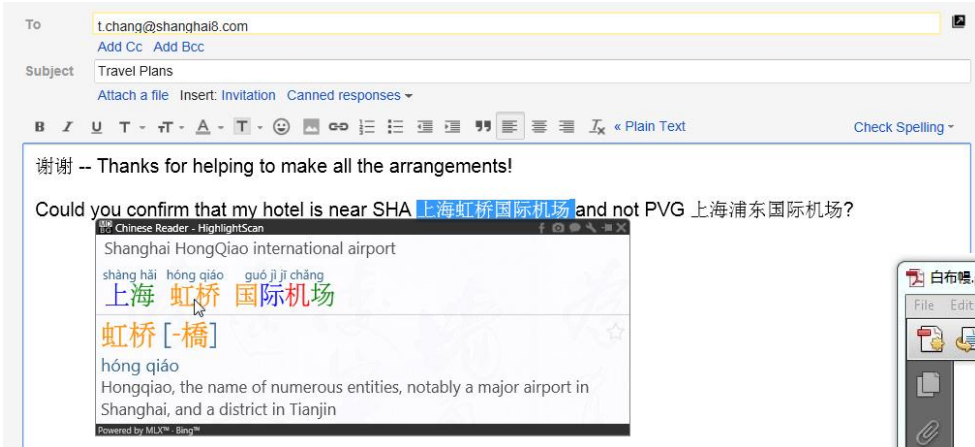

Portfolio of Screen Images

Understand error messages and dialog boxes inside Microsoft Windows (Chinese edition)

In MDBG Chinese Reader, Universal Access means you can understand Chinese text **almost everywhere with your mouse**. Instead of opening another window or application, Chinese Reader's pop-up windows provide the information you need on the web, in productivity applications and even inside even inside Microsoft Windows itself.

Universal Access works **everywhere you can select text** on your screen. If you can highlight text and copy it to the clipboard or another application, then MDBG Chinese Reader can help you understand and learn it. Graphics and other bitmapped text are not support at this time.

From the **Tencent web desktop**, double-click to open any window. MDBG Chinese Reader can help you understand the captions for each icon. Sorry, the graphics-based text in the eBook viewer (library) is not supported.

Navigate many of the Tencent web screens in Chinese. Before agreeing to anything, use Chinese Reader's **HighlightScan** to make sure you understand the text. Some dialog boxes use graphical text but others use ordinary text and Chinese Reader can help you understand prompts and options.

Chinese Reader works with the Tencent's popular **QQ International** (v1.2) messenger. LiveScan or HighlightScan over messages, history, profile text and more. In some cases, clicking (or double-clicking) allows the text to be unlocked for editing and translation.
